YOUSEF ODEH

Amman, Jordan | +962 782 534 394 | you20240781@std.psut.edu.jo | LinkedIn | GitHub | Portfolio

SUMMARY

Software Engineering student with hands-on software development experience in full-stack development, relational databases, and algorithmic problem solving. Teaching Assistant for Data Structures and Object-Oriented Programming, with competitive programming experience in PCPC and JCPC. Interested in software engineering, backend development, and full-stack development opportunities.

EDUCATION

B.Sc. in Software Engineering Expected Jun 2028
Princess Sumaya University for Technology (PSUT) | Amman, Jordan

EXPERIENCE

Teaching Assistant - Data Structures & Algorithm Analysis Jul 2026 - Aug 2026
Princess Sumaya University for Technology (PSUT) | Amman, Jordan

- Led review and problem-solving sessions covering data structures, algorithm analysis, and algorithmic problem-solving techniques.
- Supported quiz preparation, grading, and one-on-one mentoring to help undergraduate students strengthen problem-solving and debugging skills.

Teaching Assistant - Object-Oriented Programming Feb 2026 - May 2026
Princess Sumaya University for Technology (PSUT) | Amman, Jordan

- Led undergraduate C++ lab sessions covering classes, inheritance, polymorphism, encapsulation, and object-oriented design.
- Guided students through debugging, implementation, and application of OOP principles in programming assignments and lab exercises.

PROJECTS

Hospital Management System | PHP, JavaScript, MySQL, Oracle SQL, HTML, CSS

- Engineered a full-stack hospital management platform supporting patient admission, room allocation, staff scheduling, and vital-sign monitoring.
- Designed the relational database from EER modeling through normalization and implemented the application using MySQL and Oracle SQL.
- Developed a REST-style backend layer and interactive dashboard connecting frontend workflows with persistent database records.

JavaZero - Interactive Java Learning Platform | JavaScript, HTML, CSS | Live Demo

- Built a framework-free learning platform with 78 lessons across 15 modules, quizzes, 26 badges, and progress tracking persisted in LocalStorage.
- Integrated an in-browser Java compiler playground with interactive console input and plain-English explanations of compiler errors.

JSVERSE - Interactive JavaScript Learning Arcade | JavaScript (ES Modules), HTML, CSS | Live Demo

- Developed an interactive JavaScript course with 18 lessons, 11 visualizers, and 47 coding challenges graded by automated tests.
- Isolated learner code in Web Workers and sandboxed iframes with execution timeouts to protect the app and stop infinite loops.

MLVERSE - Interactive Machine Learning Lab | JavaScript, HTML, CSS, Canvas | Live Demo

- Built an interactive machine-learning course for digital analytics with 8 live experiments, 5 challenges, and XP-based progress.
- Implemented a from-scratch ML toolkit (logistic regression, KNN, decision trees, linear regression, K-Means) with Canvas visualizations.

Coffee Rush - Pixel-Art Browser Game | JavaScript, Phaser 3, Vite, Vitest | Live Demo

- Developed a coffee-shop management game with order taking, drink preparation, scoring, upgrades, and achievements, with all art and audio generated in code.
- Wrote Vitest unit tests for game rules and set up a GitHub Actions pipeline that tests, builds, and deploys to GitHub Pages.

MindBloom - Academic Schedule Planner | JavaScript, HTML, CSS | Live Demo

- Developed a web-based academic scheduling application with a calendar interface for managing lectures, assignments, and exams.
- Implemented browser-based LocalStorage persistence to retain schedules across sessions and deployed the application using GitHub Pages.

TECHNICAL SKILLS

Programming Languages: C++, Java, Python, JavaScript, PHP, SQL
Web Development: HTML, CSS, JavaScript, PHP, REST-style APIs
Databases: MySQL, Oracle Database, SQL, PL/SQL
Developer Tools: Git, GitHub, Linux
Core Concepts: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Database Design, Algorithm Analysis

ACHIEVEMENTS & TRAINING

Competitive Programming: PCPC 2026, JCPC 2025, Amman CPC 2025
Training: DevOps on AWS & Project Management - Amazon Web Services (2025); Data Science & AI - PSUT (2024)
