SUMMARY

Motivated 2nd-year Software Engineering student at Princess Sumaya University for Technology with a strong foundation in programming, algorithms, data structures, and full-stack development. Experienced as a Teaching Assistant and active competitive programmer (Codeforces, PCPC, JCPC). Seeking opportunities to apply technical knowledge, develop practical skills, and contribute effectively to engineering teams.

EDUCATION

Bachelor of Software Engineering

Expected June 2027

Princess Sumaya University for Technology (PSUT) — Amman, Jordan

EXPERIENCE

Teaching Assistant — Object-Oriented Programming

Feb 2026 – May 2026

Princess Sumaya University for Technology (PSUT) — Amman, Jordan

- Led lab sessions for the undergraduate OOP course, guiding students through C++ concepts including classes, inheritance, polymorphism, and encapsulation.

PROJECTS

Hospital Management System | MySQL · Oracle · PHP · JavaScript · HTML/CSS

- Built a full-stack relational database-driven platform covering patient admission, room management, staff scheduling, and vital sign monitoring.
- Designed the complete schema from an EER diagram through normalized relational mapping, then implemented the web app with a REST-style API layer and live dashboard.
- Collaborated with a teammate under faculty supervision at PSUT.

MindBloom — Academic Schedule Planner | HTML · CSS · JavaScript

- Designed and developed a web-based academic scheduling app with a calendar interface and categorized events (lectures, assignments, exams).
- Implemented local-storage data persistence; deployed publicly at yousefammmar.github.io/MindBloom.

Potato Runner — Maze Escape Game | Python · Pygame

- Developed a fully playable maze escape game with procedurally generated mazes via recursive backtracking and three difficulty levels.
- Features smooth animated player movement and real-time tracking of moves and elapsed time.

Car Dealership Management System | C++ · OOP

- Designed and implemented an object-oriented system to manage cars, customers, and sales operations.
- Applied core OOP principles — encapsulation, inheritance, and modular design.

SkyCast — Weather Forecast Dashboard | HTML · CSS · JavaScript

- Built a responsive weather dashboard displaying current conditions and a 5-day forecast with °C/°F conversion.

CERTIFICATIONS & ACHIEVEMENTS

- PCPC 2026 — Ranked 29th / 61 teams
- JCPC 2025 — Ranked 65th / 100 teams
- Amman CPC 2025 — Ranked 55th / 75 teams
- DevOps on AWS & Project Management — Amazon Web Services (2025)
- Data Science and AI — PSUT (2024)
- Web Design Course — PSUT (2021)

TECHNICAL SKILLS

Languages: C, C++, Java, Python, C#

Web: HTML, CSS, JavaScript, PHP

Databases: MySQL, Oracle SQL, PL/SQL

Tools & Platforms: Git, GitHub, Arduino, EMU 8086, Linux

Concepts: OOP, Data Structures & Algorithms, Competitive Programming (Codeforces), Embedded Systems
